

Feeling Unreal: Depersonalization Disorder and the Loss of the Self

Everything feels unreal to me, like a dream...I feel detached, like a stranger to myself. These are quotes from actual people, experiencing something they don't understand. What they are saying is being heard by friends, families, and physicians today more than ever before. They do not simply suffer from anxiety, or depression, and they are not schizophrenic. They have found themselves trapped in a very real and singular disorder, yet few even know its name. Their enigmatic state of mind has been studied for more than 100 years, but only recently has it become clear how prevalent and how distinctive it really is. The condition is called Depersonalization Disorder, and *Feeling Unreal* is the first book to reveal what it's all about. This important volume explores not only Depersonalization, but the philosophical and literary implications of selflessness as well, while providing the latest research, possible treatments, and ways to live and thrive when life seems unreal. For those who still believe that such experiences are merely part of something else, that depersonalization is just a symptom and not a disorder in its own right, *Feeling Unreal* presents compelling evidence to the contrary. This book provides long-awaited answers for people suffering from Depersonalization Disorder and their loved ones, for mental health professionals, and for all students of the condition, while serving as a wake up call to the medical community at large.
