

Heart Disease and Pregnancy.

138 pages, by MACKENZIE, Sir James (1853-1925) Regarded as one of the greatest English cardiologists. He was born in Scone, Scotland and studied medicine at Edinburgh University. He established his practice at Burnley, Lancashire where he developed his own ink polygraph with which he was able to simultaneously record the arterial and venous pulsations during his study on arrhythmias. He was the first to note the loss of effective atrial contraction and named it Atrial paralysis. The condition was later re-named atrial fibrillation by Sir Thomas Lewis (1881-1945). Mackenzie also described the functional pathology of cardiac tissue in 1907 and established the use of digitalis in treatment of auricular fibrillation. He published Diseases of the Heart (1908), Principles of Diagnosis and Treatment in Heart Affections (1916), and The Future of Medicine (1919). He was knighted in 1915, and in 1918 he founded the James Mackenzie Institute at St Andrews to promote clinical research.
